

Senior Software Engineer with 19+ years of experience building scalable backend systems, SaaS platforms, and data-driven products. Strong background in Python, Linux, cloud infrastructure and production-grade systems.

SKILLS

- Python
- Bash script
- PostgreSQL
- JavaScript
- HTML5
- CSS3
- JQuery
- MySQL
- Django
- FastAPI
- Docker
- Git
- Linux
- Node.js

EDUCATION

Postgraduate Specialization in Digital Game Design

PUCRS
Porto Alegre, RS, Brazil
2026 – 2027 (in progress)

B.S. Computer Engineering

Centro Universitário Univates
Lajeado, RS, Brazil
2011

Final paper was a web application for creating ideas, using collective intelligence concepts like recommendations and keywords extraction.

Applied Computer Science

Academic Exchange at Fachhochschule Gelsenkirchen
Gelsenkirchen, Germany
09/2008 – 02/2009

- Programming Project (Programmierprojekt)
- Game Programming and Multi-agent Systems
- Trainee at the Institute for Internet Security – if(is) (Institute für Internet-sicherheit, <http://www.internet-sicherheit.de/>)

Languages Proficiency

- Portuguese: native
- English: fluent

INTERESTS

- Framework Development
- Game Development
- Coding Standards
- Music Production
- Science Fiction
- Video Games

WORK EXPERIENCE

Software Engineer

Keystone Strategy · USA

06/2023 – Present

Delivered across AI product workflows, cloud infrastructure, developer tooling, and full-stack application development for enterprise clients.

- Designed, shipped, and maintained LLM-powered product workflows, backed by performance (Locust) and end-to-end (Selenium) testing for reliability at scale.
- Built and hardened cloud infrastructure with Terraform and Kubernetes, improving deployment reliability across multiple internal platforms.
- Created developer tooling for repository analysis, release automation, and reusable project scaffolding, streamlining engineering workflows across teams.
- Contributed full-stack features to a client-facing catalog application: background workers, database migrations, and deploy-on-merge CI/CD pipelines.

- Python
- TypeScript
- JavaScript
- LangChain
- FastAPI
- AWS
- Terraform
- Kubernetes
- Docker
- Shell

Back End Developer

Timz · Berlin, Germany

10/2021 - 05/2023

Back end development and sysadmin of asynchronous and synchronous video conference software.

- Bug fixing and feature development
- Node.js backend implementation for efficient Google Meet call recording
- Development of comprehensive video data insights solution
- Management and maintenance of multiple video conference servers on AWS
- Vulnerability assessments and fixes
- Responsible for servers maintenance
- Assistance with front-end tasks
- Deployed essential tools like Sentry, monit, Umami and Grafana

- Python
- FastAPI
- Neo4j
- Docker
- PostgreSQL
- Node.js
- AWS
- Linux

Software Engineer and co-founder

Simbio · Porto Alegre, Brazil

01/2013 - 10/2021

- Full stack development and design of an ERP SaaS
- Implementation and integration of Brazilian electronic invoice system
- Participation in IBM SmartCamp Brazil, winning People's Vote award
- Recipient of Most Innovative Product award at Brazilian Retail Fair in 2017

- Python
- PostgreSQL
- Django
- Odoo
- Linux
- Nginx
- Bash
- CSS3
- JQuery
- HTML5

Full Stack Developer

PROGE · Porto Alegre, Brazil

08/2012 - 03/2014

- Development of new Odoo/OpenERP modules
- Development of open source libraries for Brazilian tax and accounting rules

- Python
- PostgreSQL
- Odoo
- Nginx
- Bash
- Third-party APIs

Full Stack Developer/Software Engineer

Solis · Lajeado, Brazil

05/2008 - 08/2008 and 03/2009 - 08/2012

- Framework development for Solis software
- Maintenance of coding standards and support for the development team

- PHP
- JavaScript
- PostgreSQL
- MySQL
- Apache
- PL/pgSQL
- Bash
- Dojo Toolkit

Front-end Developer

Institute for Internet Security – if(is) · Gelsenkirchen, Germany

09/2008 - 02/2009

- Development of IT security yellow pages portal
- Received a recommendation letter

PHP

HTML

CSS

Full Stack Developer

Distance Education Department - Univates · Lajeado, Brazil

9/2006 – 04/2008

- Full stack development of e-learning software TelEduc
- Substitute for a professor to continue research on audio and video formats for live streaming
- Collaboration with the TV team for live streaming preparations

PHP

MySQL

JavaScript

HTML

GStreamer

Apache

Linux

Bash
